MINETRUCK

**“ ROCK MINING MACHINES
OFFERS A **WORLD-CLASS,**
FULL-CIRCLE SERVICE TO THE
SOUTH AFRICAN **TRACKLESS**
MINING INDUSTRY. ”**

FROM HUMBLE BEGINNINGS...

From a very humble background with over two decades of experience, Rock Mining Machines (RMM) offers a world-class, full-circle service to the South African trackless mining industry. A passion for productivity and service encapsulates the essence of what the company is about. Our South African roots give us the home-ground advantage in the local industry, with specialist knowledge and skills for building and refurbishing trackless underground mining machines suited to your needs.

Being able to offer this highly-demanded service of rebuilding machines, and providing components, spare parts and rental machines to our clients on request has taken many years of bravery and endurance, especially in the uncertain mining industry.

“ WE AIM TO BE THE PREFERRED CHOICE IN **COST-EFFECTIVE MINING SOLUTIONS** IN SOUTH AFRICA, TO **BUILD THE BEST PRODUCTS** & TO PROVIDE **OUTSTANDING SERVICE.** ”

A VISION OF CHANGE

It is our goal to be a leader in the South African mining industry; to provide an affordable and timeous alternative to in-demand products. We aim to be the preferred choice in cost-effective mining solutions in South Africa, and replicate this success by equipping other parts of Africa.

Our promise to you is to provide full-circle solutions in the mining industry, to build the best products, to provide outstanding service, and to inspire and implement solutions that relieve the socio-economic crisis. We aim to support the economy of the communities we serve and enrich them by imparting knowledge, wealth, vigour and bravery. We believe that no challenge is insurmountable.

“ WE BUY & REFURBISH **TRACKLESS UNDERGROUND MINING MACHINES** TO BE USED PREDOMINANTLY IN **GOLD, PLATINUM, DIAMOND & CHROME** SECTORS ”

AN ALTERNATIVE OFFERING

We pride ourselves in providing a diverse offering to a niche market- buying and refurbishing trackless underground mining machines to be used predominantly in gold, platinum, diamond and chrome sectors.

The machines are inspected thoroughly to determine the extent of work needed and then presented to you as an option for refurbishing. The good clean runners are serviced and washed, ready for use. All other machines are fully refurbished- components are rebuilt and strictly tested under industry standards. All machines are then offered to you as a monthly rental, an outright sale or on a rent-to-own basis.

All of our machines are offered at competitive prices, but it's the time frame in which we are able to build and refurbish machines that is our greatest strength.

THE COMPONENTS WE OFFER INCLUDE

- **Torque convertors/ Transvertors**
- **Axles**
- **Transmissions**
- **Brake heads**
- **All power train components**
